Honorable Blumenfeld:

I have been with Harry's Nurse's Registry in the capacity of Registered Professional Nurse, or RN, for almost six years. Mr. Harry's Agency has always conducted business in a professional and respectful manner. They are always available to provide information or solve problems.

In the summer of 2010, Mr. Harry became a Godsend for me. I recall that there were some hospital closings and suddenly nursing jobs became scarce in this state. I am employed by a few agencies, and had just completed a year long assignment with another agency. I called all my employers, including Harry's but to my surprise nothing was available. I became so desperate that I began using the yellow pages, and still no employment. The personnel department of one agency suggested that I would fare better if I left the state and I stated that other nurses already had.

Somehow Mr. Harry remembered how desperate I had become and when some cases finally became available, he asked could I do the hours and the days that the family requested. I took the case, where I remain to this day. Your Honor, I ask on behalf of Mr. Harry that you find it in your heart to be lenient with case. I appreciate it greatly that you took the time to read this.

Sincerely,

Diana Purkiss
